

MONSON
VISION

Clear Vision Guarantee

We are so confident in our technology, experience of our surgeons, and vision outcomes, that we back up the results of our vision correction procedures with a full money back guarantee.

If you have not achieved 20/25 vision during the 12 month post-operative period, we will refund your procedure fee.

Clear Vision Guarantee Terms

Must have complied with postoperative medication instructions/regimen and required follow-up examinations and treatment recommendations

- The guarantee is that you will achieve 20/25 or better vision with both eyes open at any time during your 12 month postoperative period
- Program does not guarantee 20/25 or better vision the rest of the patient's life
- Patient must make an honest effort when vision is tested
- Refund issued upon your execution of an appropriate release provided by Monson Vision

Lifetime Vision Security

We also provide the lifetime security of knowing that if your vision ever falls below 20/40 (20/50 or worse in distance corrected eye), we will provide an enhancement at no additional charge.

Lifetime Vision Security Terms

- Requires annual eye examination at affiliated eye doctor's office
- Vision must be below 20/40 to receive enhancement
- Vision deterioration cannot be due to trauma, disease or presbyopia, and deemed by surgeon to be correctable with laser enhancement
- Enhancements must be medically safe and advisable
- Must have enough corneal tissue available to safely perform enhancements
- Patient must make an honest effort when vision is tested

Eligibility Requirements

Applies to both Clear Vision Guarantee and Lifetime Vision Security

- Guarantee applies to ReLEX SMILE, LASIK with Ziess VisuMAX and WaveLight® EX400 lasers only, and PRK nearsighted Wavefront-optimized treatments with WaveLight® EX400 laser only, and performed at Monson Vision
- Guarantee applies to patients who have not had previous refractive surgery, including LASIK, PRK, RK, Cornea Inlays, or Cataract Surgery
- Guarantee applies to myopic (nearsighted) treatments for distance vision. Hyperopic (farsighted) and monovision treatments are excluded
- Prescription must be -6.00 diopters or less of myopia and -3.00 diopters or less of astigmatism.
- Vision must be correctable to 20/20 or better preoperatively
